Feature	ECU REMAPPING
Available Options	Option Description
CHECK ENGINE LIGHT	When installing Tubi Style aftermarket optional down pipes with sports catalytic converters or without catalytic converters, or when removing the stock exhaust that includes electric valves, or Gasoline Particulate Filter, remapping the ECU is mandatory, in order to prevent potential »check engine light« warning signals.THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE...
PERFORMANCE	When installing Tubi Style aftermarket exhaust system that was developed for use on closed tracks, we recommend remapping the ECU in order to maximize the performance of the car, in order to avoid leak of torque problems on turbo cars, and to prevent potential »check engine light« warning signals.THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE...
Feature	END TIPS DESIGN
Available Options	Option Description
MINI PROPELLA	The tips are straight cut, with a welded aesthetical micro-fusion..
OBLIQUE CUT	The tips are oblique cut, with an angle harmonized to the side view of the car..

OE	The muffler should be used together with OE end tips...
OE SHAPED	Tubi Style end tip is a copy of the OE tip...
OVAL	The shape of the end tips is oval, to match the rear bumper profile...
OVAL OBLIQUE CUT	The tips are oval oblique cut, with an angle harmonized to the side view of the car
ROLLED LIP	The tips have a rolled lips on their end line....
STRAIGHT CUT	The tips are straight cut..
STRAIGHT TRAPEZOIDAL CUT	
Feature	END TIPS DIMENSION

Feature	END TIPS FINISH
Available Options	Option Description
BRONZE	The material is polished and heat treated to obtain a controlled oxidation. In this way, the material become bronze looking.

BRUSHED	Brushing the stainless steel produces a distinctive look with a muted luster and a pattern of fine parallel lines. It has strong decorative appeal without being too reflective...
CARBON	Carbon fiber reinforced polymer has an extremely high tensile strength to weight ratio, surpassing that of all metals. We exclusively use aerospace, and formula 1 grade pre-preg carbon fiber to achieve the lightest and strongest carbon fiber for the most extreme conditions...
CERAMIC BLACK COATING	Black Zirconium ceramic coating process adds a layer of ceramic to the component, which will reduce heat soak, and improve scavenge, leading to greater performance, and a cooler look and feel.
FLAMED TITANIUM	Titanium reacts with oxygen to form a clear oxide, TiO2. This clear oxides filters out light waves, producing brilliant colors. As the thickness of oxide varies, so will color. Tubi Style skilled technicians manually flame the ecomponents to increase the oxide thickness to produce a spectrum of color similar to a rainbow. Because colors are optically created you can see subtle differences in the amount and/or shade of color from morning to twilight hours of the day. The angle of viewing, and typ
POLISHED	Mirror finishes are highly reflective and created by polishing the stainless steel. The polishing process enhances appearance and consistency, making cleaning easier. A special rolling procedure is used. It is essential to remove deep scratches as any surface defects will be very noticeable on the finished product. it improves corrosion resistance. The polishing eradicates crevices where corrosive particles can lodge themselves...
SANDBLASTED	Sandblasting is process of smoothing and cleaning a hard surface by forcing solid particles across that surface at high speeds using compressed air. It has a decorative appeal without being reflective...
Feature	END TIPS NUMBER AND POSTION
Available Options	Option Description
1 + 1 CENTRAL	two single separated end tips positioned in the middle of the rear bumper
1 + 1 LATERALLY	The end tips are on the bottom of the car, on both sides. Every side has a single dedicated tip...
1 LATERALLY	The end tip is on the bottom of the car, on one side...
2 + 1 CENTRALLY	The end tips are in the middle of the rear bumper. There is a central tip of a different diameter respect to the two side tips...
2 + 2 CENTRALLY	The end tips are in the middle of the rear bumper. There are two couples of tips, separated by the license plate. ..
2 + 2 LATERALLY	The end tips are on the bottom of the car, on both sides. Every side has two dedicated tips...
2 CENTRALLY	The end tips are in the middle of the rear bumper...
3 CENTRALLY	The end tips are in the middle of the rear bumper...

4 CENTRALLY	The 4 central end tips are in the middle of the rear bumper...
Feature	EXHAUST VALVE
Available Options	Option Description
ELECTRIC VALVE	The exhaust system includes a welded electrical valve, that is identical to the stock one that it has been removed. The electric actuator is not included, it should be used the stock one. The actuator off-set set up should be done as described into the OE wrokshop manual. Differently, a check engine light may turn on...
NO VALVE	The exhaust system is not including the valve. The pneumatic valve command line should not be connected, or the electric actuator should be mounted on the supplied valve emulator. In this case, the actuator off-set set up should be done as described into the OE wrokshop manual. Differently, a check engine light may turn on...
PNEUMATIC VALVE	The exhaust system includes a welded pneumatic valve, that is identical to the stock one that it has been removed.
Feature	HEAT SHIELDING
Available Options	Option Description
HEAT SHIELDED	Exhaust heat shields can be used on a manifold, header, pipe, mufflers and catalytic converters. The Tubi Style exhaust heat shields can stop up to 60 percent of radiant heat from the exhaust system.
Feature	LEGAL COMPLIANCY
Available Options	Option Description
EC HOMOLOGATED	This product is compliant with the applicable requirements of the European Union Directive EC 97/24 or the European Commission Delegated Regulation (EU) No. 134/2014 supplementing Regulation No. 168/2013 (EU) of the European Parliament and of the Council as indicated in the attached EC type approval document in the package and available on the product website...
OFF ROAD USE ONLY	When installing Tubi Style aftermarket exhaust system that was developed for use on closed tracks, THE PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE...
UNDER HOMOLOGATION	The component has been positvely tested from TUV, EC homolgation approval is pending...

Feature	MAIN PIPE DIMENSION
Available Options	Option Description
Feature	MATERIAL
Available Options	Option Description
AISI304 STAINLESS STEEL	Stainless steels are used in motor vehicle applications because they are resistant to corrosion and high temperature oxidation, offer energy absorption properties and maintain their mechanical properties over a wide temperature range. Although Stainless Steel is a heavier option than Inconel, thanks to our skills, we work with very thin wall tube to keep weight to a minimum.
INCONEL 625	Inconel 625 is a material with excellent mechanical properties at both extremely low and extremely high temperatures. Outstanding resistance to pitting, crevice corrosion and intercrystalline corrosion, high resistance to oxidation at elevated temperatures up to 1050C. These properties makes possible the construction of thin structural parts of high heat transfer. Since inconel can be used in such extreme environments, it is a perfect material
IRON	We utilize materials which ensure that the characteristics of the era are maintained to preserve their iconic exhaust sound. Our Restauro d'Epoca range is iron made, to comply with the genuine parts, and ensure to the owner the value of his car...
TITANIUM	Standard grade 2 Titanium is only capable of coping with exhaust temperatures of up to 450°C. We have sourced a Titanium alloy with the same weight as grade 2 titanium, this alloy is capable of withstanding temperatures of up to 800°C. For manifolds and downpipes we use either Inconel or stainless steel.
Feature	MOUNTING INSTRUCTIONS
Available Options	Option Description
PULG-AND-PLAY COMPONENT	Plug-and-play components should be mounted as the OE substituted parts, using the official car model workshop manual...
SPECIAL MOUNTING INSTRUCTIONS	The fitting of the part requires specific Tubi Style mounting instructions, available inside the product box, or on www.tubistyle.com web site...

Feature	RESONATORS
Available Options	Option Description
GPF REMOVAL	This product remove the OE GPF to increase the engine's performance and to add an aural improvement for all to appreciate, by providing improved flow for the exhaust gases...
RESONATOR AND GPF REMOVAL	This product remove the OE GPF and OE resonator to increase the engine's performance and to add an aural improvement for all to appreciate, by providing improved flow for the exhaust gases. Driver may get drone sound at certain engine speeds...
RESONATOR REMOVAL	To reduce the counter pression and to improve the sound, this component subsitute and delete the OE resonator. Driver may get drone sound at certain engine speeds...
SECONDARY CAT REMOVAL	This product remove the OE secondary catalytic converters to increase the engine's performance and to add an aural improvement for all to appreciate, by providing improved flow for the exhaust gases...
WITH RESONATOR	The component includes a resonator designed to eliminate unwanted resonance or noise at a particular RPM, also known as exhaust drone. Tubi Style resonator is designed to so not affect the overall volume and to provide a smoother exhaust note. ..
Feature	SOUND
Available Options	Option Description
+ RUMORE	+ Rumore bring the sound level to an higher volume. the Tubi timbric remains..
SOLO TUBO	This is the straight pipe solution, that guarantee the highest volume, toegther with the most im portant weight reduction..
TUBI SOUND	Tubi Sound is the standard sound of Tubi Style exhaust systems. This is our iconic sound, louder and more powerfult than the OE sound...
Feature	VALVETRONIC SYSTEM
Available Options	Option Description
EXCU STANDALONE	The optional Tubi Style Exhaust Control Unit Kit enables owners of selected Tubi Style car exhausts to control the sound of the system of their car. Using Tubi Syle technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate the valves. In this case, EC homo

EXCU VALVETRONIC	Th exhaust system includes a dedicated Tubi Style Exhaust Control Unit Kit, that enables owners of selected Tubi Style car exhausts to control the sound of the system of their car. Using Tubi Syle technology, drivers can easily switch between the quiet mode and a sportier sound. With the use of a receiver to drive the actuators that open or close the valves at the end of the exhaust system, drivers can use the Sound Remote Controller or the new smartphone app (for iOS and Android) to regulate th
